A **sentence fragment** results from a *missing* subject, verb or complete thought.

→ *Example:* Because he was lost.

THERE ARE FOUR TYPES OF SENTENCES: SIMPLE, COMPOUND, COMPLEX, OR COMPOUND-COMPLEX

A **simple sentence** consists of one main clause. It expresses one main thought and has one subject and one verb. A simple sentence may contain a compound subject, compound verb, or both.

→ *Examples:* We enjoyed the concert.

Amy and Scott were married yesterday. (compound subject)

Ben is leaving work and going home. (compound verb)

A **compound sentence** contains two or more main clauses (in *italics*) connected by a conjunction, a semicolon, or a comma with a conjunction.

A **complex sentence** has one main clause (in *italics*) and one or more subordinate clauses (underlined).

→ *Example:* Dad says that good grades are the result of diligent studying. (main clause) the independent clause

Diligent studying is difficult; because I have to work several hours before I can start studying. (main clause) the dependent clause

A **compound-complex sentence** has two or more main clauses (in *italics*) and one or more subordinate clauses (underlined).

→ *Examples:* Because the bus broke down, the team rode in a van, and she overleaded in cars.

Unless my eyes are deceiving me, Kian was the runaway horse, and Duke is behind her.

→ *Exceptions:* seize, cease, either, leisure, neither

When the *ie/ei* combination is not pronounced *ee*, it is usually spelled *ei*.

→ *Examples:* reign, weigh, neighbor

When a multi-syllable word ends in a consonant preceded by one vowel, the accent is on the last syllable and the suffix begins with a vowel, the same rule applies. When you double the final consonant.

If a word ends with a silent *e*, drop the *e* before adding a suffix that begins with a vowel.

LANGUAGE ARTS *the writing process*

WRITING VARIABLES

BEFORE BEGINNING ANY ASSIGNMENT, IT WILL HELP YOU TO FOCUS AND REMAIN CONSISTENT IN STYLE IF YOU CONSIDER THE FOLLOWING VARIABLES.

Audience

For whom am I writing? A letter written to your ten-year-old sister will be much different in vocabulary, subject, content, format, and sentence complexity than one written to your senator.

Topic

About what subject should I write? If possible, choose a subject that interests you. Research your subject well.

Purpose

Why am I writing? Have a clear purpose in mind before starting your paper. Are you writing to entertain, instruct, inform, or persuade? Keeping your purpose in mind as you write will result in a paper that is focused and consistent.

Voice

What point of view or "voice" will I use? Writers sometimes write from the point of view of another person rather than from their own point of view. This can add variety and help you see your subject in a new way. Make sure your "voice" remains consistent.

Format

What form will my writing take? Different forms of writing, such as letters, diaries, reports, essays, research papers, etc., have specific requirements. Decide on the form your writing will take, and then make sure you know the requirements for that form of writing.

PLANNING AND WRITING AN ESSAY OR COMPOSITION

- (1) Select a general subject area that interests you.
- (2) Make a list of your thoughts and ideas about the subject.
- (3) Use your list to help focus on a specific topic within the subject area.
- (4) Decide what you want to say about the topic, and write an introductory statement that states this purpose.
- (5) Make a list of details to support your statement.
- (6) Arrange your list of details into an outline.
- (7) Do any planning and research necessary to provide additional support for specific areas of your outline. Keep a complete list of all of your sources for your bibliography.
- (8) Write a first draft.
- (9) Revise your first draft, making sure that:
 - (a) The introduction includes a clear statement of purpose.
 - (b) Each paragraph begins with some link to the preceding paragraph.
 - (c) Every statement is supported or illustrated.
 - (d) The concluding paragraph ties all of the important points together, leaving the reader with a clear understanding of the meaning of the essay or composition.
 - (e) Words are used and spelled correctly.
 - (f) Punctuation is correct.
- (10) Read your revised paper aloud to check how it sounds.
- (11) Proofread your revised paper two times: once for spelling, punctuation, and word usage, and again for meaning and effectiveness.

OUTLINING

OUTLINES CAN HELP YOU ORGANIZE YOUR IDEAS. YOU MIGHT USE AN OUTLINE TO PLAN A SPEECH, COMPOSITION, OR TERM PAPER. YOU ALSO MIGHT USE AN INFORMAL OUTLINE TO TAKE NOTES.

formal

A **formal outline** lists the main points of a topic and shows the relative importance of each and the order in which these points are presented. It also shows the relationships among them.

Formal Outline Format:

- I.
 - A.
 - B.
 - 1.
 2.
 - a.
 - b.
 - (1)
 - (2)
 - (a)
 - (b)

II.

No new subdivision should be started unless there are at least two points to be listed in the new division. This means that each I must have a 2; each a must have a b. Formal outlines may be either a **sentence outline** or a **topic outline**.

A **sentence outline** uses a complete sentence for each point and subpoint. A **topic outline** uses words or phrases for each point and subpoint.

informal

An **informal outline** uses as few words as possible. Supporting details are written below each heading. Numerals, letters, or dashes may be used. Informal outlines are especially useful for taking notes.

→ Here is an example of a informal outline.

- I. How lightning occurs
 - cloud's particles collide and become positively and negatively charged particles
 - positively charged particles in cloud collide with negatively charged particles on ground
- II: Forms of lightning
 - forked
 - streak
 - ribbon
 - bead or chain
 - ball

→ Here is an example of a topic outline.

YOUR WORKS-CITED LIST

Your works-cited list should appear at the end of your essay. It provides the information necessary for a reader to locate and retrieve any source you cite in the essay. Each source you cite in the essay must appear in your works-cited list; likewise, each entry in the works-cited list must be cited in the text.

According to the *Modern Language Association Handbook for Writers of Research Papers, 8th edition*:

- (1) Double-space all entries.
- (2) Begin the first line of an entry flush with the left margin, and indent lines that follow by one-half inch.
- (3) List entries in alphabetical order by the author's last name. If you are listing more than one work by the same author, alphabetize the works according to title. Instead of repeating the author's name, type three hyphens followed by a period, and then give the title.
- (4) Italicize the titles of works published independently. Books, plays, long poems, pamphlets, periodicals, and films are all published independently.
- (5) If the title of a book you are citing includes the title of another book, italicize the main title but not the other title.
- (6) Use quotation marks to indicate titles of short works included in larger works, song titles, and titles of unpublished works.
- (7) Separate the author, title, and publication information with a period, followed by one space.
- (8) Use lowercase abbreviations to identify parts of a work (for example, *vol.* for volume), a named translator (trans.), and a named editor (ed.). However, when these designations follow a period, the first letter should be capitalized.
- (9) Use the shortened forms for the publisher's name. When the publisher's name includes the name of a person, cite the last name alone. When the publisher's name includes the name of more than one person, cite only the first of these names.
- (10) Use the phrase "Accessed 5 Jan. 2019" instead of listing the date or the abbreviation "n.d."

YOUR REFERENCE LIST

YOUR REFERENCE LIST SHOULD APPEAR AT THE END OF YOUR ESSAY. IT PROVIDES THE INFORMATION NECESSARY FOR A READER TO LOCATE AND RETRIEVE ANY SOURCE YOU CITE IN THE ESSAY. EACH SOURCE YOU CITE IN THE ESSAY MUST APPEAR IN YOUR REFERENCE LIST. LIKEWISE, EACH ENTRY IN THE REFERENCE LIST MUST BE CITED IN THE TEXT.

BASIC RULES

According to the seventh edition of the *Publication Manual of the American Psychological Association*:

- Indent your reference list one-half inch from the left margin, excluding the first line of each reference, which should remain flush left. This is called a hanging indent.
- Double-space all references.
- Capitalize only the first word of a title or subtitle of a work. Capitalize all major words in journal titles. Italicize titles of books and journals. Note that the italicizing in these entries includes commas and periods.
- Invert authors' names (last name first); give last name and initials for all authors of a particular work, unless the work has more than six authors (in this case, list the first six authors and then use et al. after the sixth author's name to indicate the rest of the authors). List entries by authors' last names letter by letter. If you have more than one work by a particular author, order the entries by publication date, oldest to newest (thus a 2014 article would appear before a 2015 article). When an author appears as a sole author and again as the first author of a group, list the one-author entries first. If no author is given for a particular source, alphabetize by the title of the source in the reference list. Use a shortened version of the title for parenthetical citations within the text.
- Use "&" instead of "and" before the last author's name when listing multiple authors on a single work.

BASIC FORMS FOR SOURCES IN PRINT

An article in a periodical (such as a journal, newspaper, or magazine)

- Author, A. A., & Author, B. B. (Year of publication, month day). Title of article. *Title of periodical*, volume number, issue number, page range.
- You need to list the volume number if the periodical uses continuous pagination throughout a particular volume. If each issue begins with page 1, then you should list the issue number as well → *Field of Periodicals*, volume number (issue number), pages.

A nonperiodical (such as a book, report, brochure or audiovisual media)

- Author, A. A. (Year of publication). Title of work: Capital letter also for subtitle (Edition). Publisher.
- Do not include the location of the publisher in the citation.

Part of a nonperiodical (such as a book chapter or an article in a collection)

- Author, A. A., & Author, B. B. (Year of publication). Title of chapter. In A. Editor & B. Editor (Eds.), *Title of book* (part of chapter). Publisher.

When you list the pages of a chapter or essay in parentheses after the book title, use "pp." before the numbers: (pp. 1-21). This abbreviation, however, does not appear before the page numbers in parenthetical references, except for newspapers.

BASIC FORMS FOR ELECTRONIC SOURCES

A web page

- Author, A. A. (Date of publication or revision). Title of page. Site name. URL.

An online journal or magazine

- Author, A. A., & Author, B. B. (Date of publication). Title of article. *Title of journal*, volume number (issue number), page range. doi:00000000/0000000000000

Since online materials can potentially change URLs, APA recommends providing a Digital Object Identifier (DOI), when it is available, as opposed to the URL. DOIs are unique to their documents and consist of a long alphanumeric code.

An online journal or magazine (with no DOI assigned)

- Author, A. A., & Author, B. B. (Date of publication). Title of article. *Title of journal*, volume number (issue number), page range. URL.

E-mail

Because e-mail is a personal communication, not easily retrieved by the general public, no entry should appear in your reference list. Instead, parenthetically cite in text the communicator's name, the fact that it was personal communication, and the date of the communication: The novelist has repeated this idea recently (S. Rushdie, personal communication, May 1, 2015).

EXAMPLES

Journal article, one author

- Harlow, H. E. (1983). Fundamentals for preparing psychology journal articles.

Journal of Comparative and Physiological Psychology, 55, 893-896.

Journal article, more than one author

- Kernis, M. H., Cornell, D. P., Sun, C. R., Berry, A., & Harlow, T. (1993). There's more to self-esteem than whether it is high or low: The importance of stability of self-esteem. *Journal of Personality and Social Psychology*, 65, 1190-1204.

- Coltheart, M., Curtis, B., Atkins, P., & Haller, M. (1993). Models of reading aloud: Dual-route and parallel-distributed-processing approaches. *Cognition*, 100, 589-608.

Give the secondary source in the reference list. In the text, name the original work, and give a citation for the secondary source. For example, if Coltheart and McClelland's work is cited in Coltheart et al. and you did not read the original work, list the Coltheart et al. reference in your reference list. In the text use the following citation: → In Seidenberg and McClelland's study (as cited in Coltheart, Curtis, Atkins, & Haller, 1993), ...

Magazine article, one author

- Merriam-Webster's *collegiate dictionary* (11th ed.). (2005). Merriam-Webster.
→ New drug appears to cut risk of death from heart failure. (1993, July 15). *The Washington Post*, p. A12.
For parenthetical citations of sources in text with no author named, use a shortened version of the title instead of an author's name. Use quotation marks and italics as appropriate. For example, the parenthetical citations of the two sources above would appear as follows: Merriam-Webster's, (2005) and ("New drug," 1993).

A translated work and/or a republished work

- Laplace, P. S. (1951). *A philosophical essay on probabilities* (P. W. Truscott & F. L. Emory, Trans.). Dover. (Original work published 1814).

THE VALUES OF THE LETTERS ARE ADDED TOGETHER, UNLESS A LETTER WITH A LESSER VALUE COMES BEFORE ONE WITH A LARGER VALUE. IN THIS CASE, THE VALUE IS THE DIFFERENCE OF THE TWO LETTER VALUES.

WORKING WITH FRACTIONS

The top number of a fraction is called the **numerator**.

The bottom number of a fraction is called the **denominator**.

$$\frac{1}{2}$$

To multiply:

$$\frac{1}{2} \times \frac{3}{4} = \frac{1 \times 3}{2 \times 4} = \frac{3}{8}$$

To divide, multiply the first fraction by the reciprocal of the other:

$$\frac{2}{3} \div \frac{1}{6} = \frac{2}{3} \times \frac{6}{1} = \frac{12}{3} = 4$$

To add or subtract, first find a common denominator:

$$\frac{1}{3} + \frac{2}{5} = \left(\frac{1 \times 5}{3 \times 5} \right) + \left(\frac{2 \times 3}{5 \times 3} \right) = \frac{5}{15} + \frac{6}{15} = \frac{11}{15}$$

DIETARY GUIDELINES

RECOMMENDATIONS FOR DAILY FOOD CHOICES

A balanced diet of nutrient-rich foods is a key component of overall health. Follow the food group recommendations to help you eat better every day. Each of these food groups provides some, but not all, of the nutrients you need.

A healthy diet is one that emphasizes fruits, vegetables, whole grains, and fat-free or low-fat milk products; includes lean meats, poultry, fish, beans, eggs, and nuts; and is low in saturated fats, trans fats, cholesterol, salt (sodium), and added sugars.

Daily recommendations vary depending on age, weight, calorie intake, and exercise patterns. The United States Department of Agriculture (USDA) has developed a website, ChooseMyPlate.gov, to help you figure out the foods and portions that are right for you.

GRAINS

Make half your grains whole

Eat grains, especially whole-grains, like brown rice, oatmeal, or popcorn.

Other grain choices include bread, crackers, cereal, or pasta.

VEGETABLES

Variety is the key

Eat more dark green vegetables like broccoli or spinach.

Eat orange vegetables like carrots and sweet potatoes.

Eat more dry beans and peas like pinto beans, kidney beans, and lentils.

Limit starchy vegetables.

FRUITS

Focus on fruits

Eat a variety of fruit.

Choose fresh, frozen, canned, or dried fruit. Limit fruit juices.

DAIRY

Go low-fat or fat-free

Go low-fat or fat-free when you choose milk, yogurt, and other milk products.

If you don't consume milk, choose lactose-free products or other calcium sources such as fortified foods and beverages.

PROTEIN

Go lean with protein

Choose low-fat or lean meats and poultry.

Broil, grill, or bake it, broil it, broil it.

Use your protein routine — choose more fish, beans, nuts, and seeds.

School Datebooks

Your food and physical activity choices each day affect your health — how you feel today, tomorrow, and in the future.

To find the foods and portions that are right for you, go to ChooseMyPlate.gov.

Find your balance between food and physical activity

- Be sure to stay within your daily calorie needs.
- Be physically active for at least 30 minutes most days of the week.
- About 60 minutes a day of physical activity may be needed to prevent weight gain.
- For sustaining weight loss, at least 60 to 90 minutes a day of physical activity may be required.
- Teenagers should be physically active for 60 minutes every day, on most days.

Know the limits on fats, sugars, and salt (sodium)

- Make most of your fat sources from fish, nuts, and vegetable oils.
- Limit solid fats like butter, margarine, shortening, and lard, as well as foods that contain these.
- Check the Nutrition Facts label to keep saturated fats, *trans* fats, and sodium low.
- Choose food and beverages low in added sugars. Added sugars contribute calories with few, if any, nutrients.

SUCCESS SKILLS *tips for improving your memory & taking standardized tests*

TIPS FOR IMPROVING YOUR MEMORY

- {1} Keep notes, lists, and journals to jog your memory.
- {2} Decide what is most important to remember by looking for main ideas.
- {3} Classify information into categories. Some categories may be:
 - a. Time – summer, sun, swimming, hot
 - b. Place – shopping center, stores, restaurants
 - c. Similarities – shoes, sandals, boots
 - d. Differences – mountain, lake
 - e. Wholes to parts – bedroom, bed, pillow
 - f. Scientific groups – Flowers, carnation, rose
- {4} Look for patterns. Try to make a word out of the first letters of things you are trying to remember. You also could make an acronym out of the first letters of words you need to remember.
- {5} Associate new things you learn with what you already know.
- {6} Use rhythm or make a rhyme.
- {7} Visualize the information in your mind.
 - a. See the picture clearly and vividly.
 - b. Exaggerate or enlarge things.
 - c. See it in 3D dimensions.
 - d. Put yourself into the picture.
 - e. Imagine an action taking place.
- {8} Link the information together to give it meaning.
- {9} Use the information whenever you can. Repetition is the key to memory.

TIPS FOR TAKING EXAMS

- {1} *Concentrate.* Do not talk or distract others.
- {2} *Listen carefully to the questions.* Ask questions if they are not clear.
- {3} *Pace yourself.* Keep your eye on the time, but do not worry too much about finishing.
- {4} *Work through all of the questions in order.* If you do not think you know an answer to a problem, skip it and come back to it later. If you have finished the test, you have finished the test.
- {5} *Read all of the possible answers* for each question before choosing an answer.
- {6} *Eliminate any answers that are clearly wrong,* and choose from the others. Words like always and never often signal that an answer is false.
- {7} *If you're required to write a short essay,* quickly jot down an outline to make sure you include all the key points in your answer.
- {8} *When you finish the test, go back through and check your answers for careless mistakes.* Change answers only if you are sure they are wrong or you have a very strong feeling they are wrong.
- {9} *Do not be afraid to guess at a question.* If you have a hunch you know the answer, you probably do!
- {10} *Use all of the time allotted* to check and recheck your test.

SUCCESS SKILLS *listening & homework skills*

LISTENING SKILLS

Listening (unlike hearing, which is a physical process that does not require thinking) gives meaning to the sounds you hear. It helps you understand. Listening is an active process that requires concentration and practice. In learning, the instructor's responsibility is to present information; the student's responsibility is to be "available" for learning. Not listening means you will be unable to learn the material.

To help develop listening skills:

- Approach the classroom ready to learn; leave personal problems outside the classroom. Try to avoid distractions.
- Even if you do not sit close to the instructor, focus your attention directly on them.
- Pay attention to the instructor's style and how the lecture is organized.
- Participate; ask for clarification when you do not understand.
- Take notes.
- Listen for key words, names, events, and dates.
- Don't make hasty judgments; separate fact from opinion.
- Connect what you hear with what you already know.

HOMEWORK SKILLS

- Keep track of your daily assignments in this datebook, so you will always know what you have to do.
- Homework is an essential part of learning. Even though you may not have written work to do, you can always review or reread assignments. The more you review information, the easier it is to remember, and the longer you are able to retain it. Not doing homework because you do not believe in homework is self-defeating behavior.
- It is your responsibility to find out what you have missed when you are absent. Take the initiative to ask a classmate or instructor what you need to make up. You need to also know when it needs to be turned in. If you are absent for several days, make arrangements to receive assignments while you are out.
- Have a place to study that works for you – one that is free from distractions. Be honest with yourself about using the TV or stereo during study time. Make sure you have everything you need before you begin to work.
- Develop a schedule that you can follow. Rested when you study. If you need to study in short blocks of time. Marathon study is not the best way to learn.
- Prioritize your homework so that you begin with the most important assignment first: study for a test, then do the daily assignment, etc.
- Study for 30-40 minutes at a time, then take a 5-10 minute break. Estimate the amount of time it will take to do an assignment and plan your break time accordingly.

SUCCESS SKILLS *successful notetaking*

SUCCESSFUL NOTETAKING

- Taking notes reinforces what we hear in the classroom and requires active listening. Having accurate information makes your outside study and review time that much easier. Good notetaking requires practice.
- Be aware of each instructor's lecture style; learning how to adapt to each style takes patience. Take notes as you (attentively) listen to the lecture. Keep notes in an individual notebook for each class or in a loose-leaf binder that has a section for each class. Your instructor may have certain requirements.
- Date each day's notes, and keep them in chronological order. Some instructors provide outlines that tell you how a series of lectures will be organized; other instructors will deliver their lectures and expect you to write the information in your notes. Most instructors will emphasize important points by stressing them or repeating them a few times. Make a note in the margin or highlight the instructor specifically identifies as important.
- Write notes in short phrases, leaving out unnecessary words. Use abbreviations. Write clearly so you will be able to understand your notes when you review them.
- If you make a mistake, a single line through the material is less time consuming than trying to erase the whole thing. This will save time and you won't miss anything of the lecture. Don't copy your notes over to make them neat; write them neatly in the first place. Don't create opportunities to waste your time.
- Write notes in the right two-thirds of the notebook page. Keep the left one-third free for your follow-up questions or to highlight the really important points in the discussion.
- Listen for key ideas. Write them down in your own words. Don't try to write down every word that your instructors say. Some instructors will use the chalkboard, an overhead projector, or a PowerPoint presentation to outline these key ideas. Others will simply stress them in their discussion.
- Soon after class, while the information is still fresh in your mind, create questions directly related to your notes in the left column of the paper. Place these questions across from the information to which it pertains. Highlight or underline any key points, terms, events or people. Quiz yourself by covering the 2/3 side of your notes and try to answer the questions you developed without referring to your notes. If you need to refresh your memory, simply uncover the note section to find the answers to your questions. Short, quick reviews will help you remember and understand the information as well as prepare for tests.
- Review your notes daily. This reinforces the information and helps you to be sure that you understand the material.
- Make sure your notes summarize and condense the material.
- Devise your own use of shorthand.
- Vary the size of titles and headings.
- Use a creative approach, not the standard outline form.
- Keep class lecture notes and study notes together.

SUCCESS SKILLS *plan for success*

PLAN FOR SUCCESS

SUCCESSFUL PEOPLE DON'T BECOME SUCCESSFUL BY LUCK. THEIR SUCCESS IS THE RESULT OF SETTING GOALS AND WORKING TO ACHIEVE THOSE GOALS. IN OTHER WORDS, SUCCESSFUL PEOPLE PLAN TO SUCCEED. YOU, TOO, CAN PLAN TO SUCCEED. DON'T PROCRASTINATE. GOOD INTENTIONS WILL NOT HELP YOU SUCCEED. START PLANNING FOR SUCCESS TODAY!

(1) Organization – Getting organized is the first step to success.

- Remember that you are responsible for knowing about and completing your assignments and special projects.
- Make sure you have a datebook to write down your homework, extracurricular activities, community activities, and other responsibilities.
- Make sure you have all the materials you need when you go to class and when you do your homework.

(2) Time Management – Managing time wisely will help ensure that you have the opportunity to do all the things you need to do and the things you want to do.

- Plan a definite time to do your homework.
- Plan time for your extracurricular and social activities, as well as home responsibilities.
- Commit yourself to your time plan, but be flexible. For example, if something happens that makes it impossible for you to do homework during the regularly scheduled time, plan an alternate time to do the homework.

(3) Set Priorities – If you have lots to do, it is important to set priorities.

- Rank each task in 1, 2, 3 order. Rank #1 is the most important task – and continue to rank down the list.
- When doing homework, start with the subject in which you need the most improvement.
- Check off finished tasks.
- If you frequently find that you cannot finish all the tasks on your list, you may need to prioritize your optional activities and eliminate some that are low on your priority list.

(4) Set Goals – Just wishing to get better grades or to excel in a sport accomplishes nothing. You need a plan of action to achieve your goals. Setting goals will result in better grades and higher self-esteem. Best of all, setting goals will make you feel in control of your life. Some hints for setting goals:

- Be specific. List specific goals for each academic subject. Also list goals for your school and home activities.
- Set time limits. Your goals can be short-term (within a week or on the next quiz or test) and long-term (within a semester or within the school year).
- Set realistic goals. For example, if math has always been difficult for you, don't aim for an "A" in Algebra at the beginning of the year. If you usually get a "C-" in math, you may want to begin by setting a short-term goal of "C+" or "B-". Reaching that first short-term goal will give you the confidence to raise your goal for the next test or the next grading period.
- Draw up a step-by-step plan of action for reaching each goal; then go for it!
- Write your goals down, and put them in several places (your bedroom door, your datebook, your bulletin board) so you will see them several times a day.
- Share your goals with others – your parents, roommates, instructors, classmates, etc. They can give you encouragement.
- Keep at it! Be determined, and keep a positive attitude. Visualize yourself achieving your goals.
- Reward yourself when you reach a goal.

SUCCESS SKILLS *basic résumé writing*

BASIC RÉSUMÉ WRITING

The Functional Résumé Format

The functional format is useful for graduating students who do not have extensive job experience. This type of résumé emphasizes skills and accomplishments achieved in school, activities, internships, and in life.

These are the 5 basic parts →

- (1) **Header:** your name, address, phone number, email address.
- (2) **Job objective:** a short statement describing how you can be of help to the employer and what you intend to do (e.g., sell, design, operate, manage).
- (3) **Qualifications:** a brief list or statement highlighting your background, your strengths, and what you want your employer to know about you. This can be optional.
- (4) **Skills/Achievements:** a description of your abilities, accomplishments, and areas of competence. These can also include specific skills, such as *Office Skills, Technical Experience, and Teamwork/Organization*.
- (5) **Education:** a list of all formal education, workshops, seminars, internships, school-related activities, and on-the-job training (if any). The most recent should come first.

Remember:

- Use only one or two typefaces in the design of your résumé.
- Use short phrases instead of long sentences and paragraphs.
- Line up all headings to keep your résumé looking clean and professional.
- Use good quality paper; A neutral color such as white or ivory is recommended.
- Do not include salary requirements.
- Do not include personal information such as date of birth, height, weight, marital status, health, religion, or hobbies.
- Do not use the word *résumé* at the top of the page.
- Keep your résumé to one page.
- Have a list of references (names, company names, phone numbers) ready to give if requested.

SUCCESS SKILLS *helpful hints*

THE SUCCESSFUL STUDENT'S

—(BAG OF SKILLS)—

LAUDABLE LISTENING

- Concentrate on what the instructor says.
- Avoid distractions.
- Pay attention to the lecture, and take good notes.
- Participate! Ask questions if you don't understand.
- Listen for key words, names, events, and dates.
- Don't assume or judge. Separate fact from opinion.
- Connect what you hear to what you already know.

HEALTHY HOMEWORK SKILLS

- Use this notebook to track your daily assignments.
- If you're absent, get assignments from a classmate.
- Develop a routine for completing your homework. Set aside a time; choose a place; have your supplies at hand; and turn off the TV or music.
- Study in blocks of time (if that works best for you).
- Begin with your most important assignments first.
- Take breaks periodically to refresh yourself and review what you've learned.

NOTABLE NOTETAKING

- Date your notes and organize them chronologically.
- Paraphrase and abbreviate – but make sure you understand your own shorthand!
- Use the right two-thirds of the page for notes and the left third for writing questions and highlighting key points.
- Review your notes immediately after the class session.
- Fill in any points you missed. Use lines, drawings, etc., to organize and highlight the material.

A MEMORABLE MEMORY

- Use a variety of avenues (listening, notetaking, reading, online resources, etc.) to improve your chances of retaining the material.
- Look for the main ideas, then find out how they all relate.
- Use mnemonic devices. For example, make a word out of the first letters of the items you are trying to remember. To remember the five Great Lakes, think of HOMES: Huron, Ontario, Michigan, Erie, and Superior.

- Make up rhymes using the information you want to remember.
- Visualize the information or make up a story using the different facts you must recall.
- Use and review the information as often as you can because repetition is the key to a good memory.

SUCCESS SKILLS *keeping a monthly budget*

Learning how to manage your money is an important step in becoming financially independent. It's never too early to start keeping a budget. Use this budget worksheet to determine your income and expenses. If you need to cut back on spending, little bits add up.

→ When dining out with friends, don't order a soda; drink water instead.

→ Skip costly coffeehouses and brew your own at home.

→ Save money on gas and parking by walking to class or carpooling with pals.

→ Many communities offer paying recycling programs, so cash in those cans.

→ Consider trimming "extras" that add up, such as streaming services or eating out.

CHARACTER *defining character*

CHARACTER

What's **CHARACTER** all about?

"Character is power." – BOOKER T. WASHINGTON

"What lies behind us and what lies before us are small matters compared to what lies within us." – RALPH WALDO EMERSON

As you wind your way through this world, you inevitably come to a fork in the road: You can either be noted *for* your character or known *as* a character, to paraphrase a high school principal's address to his graduating class.

Your character determines whether your friends, classmates, and family members see you as a leader, respect you as a role model, and ultimately, feel that interactions with you help them become better people.

But what values and personal attributes comprise character? To name just a few, character is defined by:

CARING Caring and concern for others are at the root of the Golden Rule – "Treat others as you want them to treat you."

HONESTY Be honest with yourself and with others in every interaction. Honesty and integrity are the core values that make respect, courage, and trustworthiness possible.

ACTIONS Your actions – not your intentions or words – are what define your character. Often, these become acts of courage, such as taking a stand against injustice, prejudice, cruelty, and other inhumane behaviors.

RESPONSIBILITY Your sense of responsibility is what compels you to do the right thing, follow through on your promises, and be accountable for your actions. Personal rights are only possible if they're accompanied by responsibility.

ACCEPTANCE Character demands that we accept others' differences and appreciate how diversity strengthens our society.

CITIZENSHIP People of strong moral character don't sit on the sidelines. Contribute your "fair share" – participate fully as a concerned student, volunteer, and voter.

TRUSTWORTHINESS Trust can't be granted; it can only be earned. Deliver on your promises. Act honestly at every turn.

EMPATHY When you empathize with others, you go beyond kindness and caring; you truly begin to see the world from someone else's perspective.

RESPECT Respect for yourself and for others is an integral component of character. Without respect, caring and empathy are empty expressions. Respect is what enables us to accept and appreciate others' differences.
